

Minimal Working Example, Tufte Style

Dr Ian Hocking

1 Basic Extended Markup Offered by Octavo

Create a task box like this (without spaces in the word ‘task’):

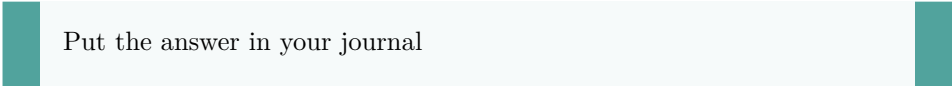

```
< t a s k > Run the analysis < / t a s k >
```

A horizontal rectangular box with a light pink background and dark red vertical bars at each end. The text "Run the analysis" is centered within the box.

Run the analysis

For a journal instruction:

```
< j o u r n a l > Put the answer in your journal < / j o u r n a l >
```

A horizontal rectangular box with a light teal background and dark teal vertical bars at each end. The text "Put the answer in your journal" is centered within the box.

Put the answer in your journal

An answer box provides an answer, and will disappear if you enter

`redact: true` in the Yaml.

```
< a n s w e r > Here is an answer < / a n s w e r >
```

A rectangular box with a dark blue header bar containing the word "Answer" and a light gray body containing the text "Here is an answer".

Answer

Here is an answer

The following will produce a highlight:

```
< r e m e m b e r > Here is a highlight < / r e m e m b e r >
```

A horizontal rectangular box with a light yellow background and olive green vertical bars at each end. The text "Here is a highlight" is centered within the box.

Here is a highlight

This next one I call ‘do’:

```
< d o > Something to be done < / d o >
```

A small purple pill-shaped button with the text "Something to be done" in white.

Something to be done

And this will make text pop out:

< p o p > Something to pop out < / p o p >

Something to pop out

This one is ‘keyword’:

< k e y > Keyword < / k e y >

Keyword

2 *A More Complex Example*

For a complete handout using figures, tables and equations, look at
